CyberLink Power Starter

CD/DVD Program

Minford Local School District
2005 - 2006
Rama Lavender, Author

CyberLink Power Starter allows you to:

copy entire CD's
create data CD's of miscellaneous files
create your own music CD's
rip audio tracks
play DVD movies

You will need to purchase blank CD's. Blank CD's
come in different speeds. Your CD burner uses 40X
speed CD's.

Copy a CD - music, software, or data

The screen below is the desktop. (I changed my background to the island scene. Your screen may be solid green or blue.)
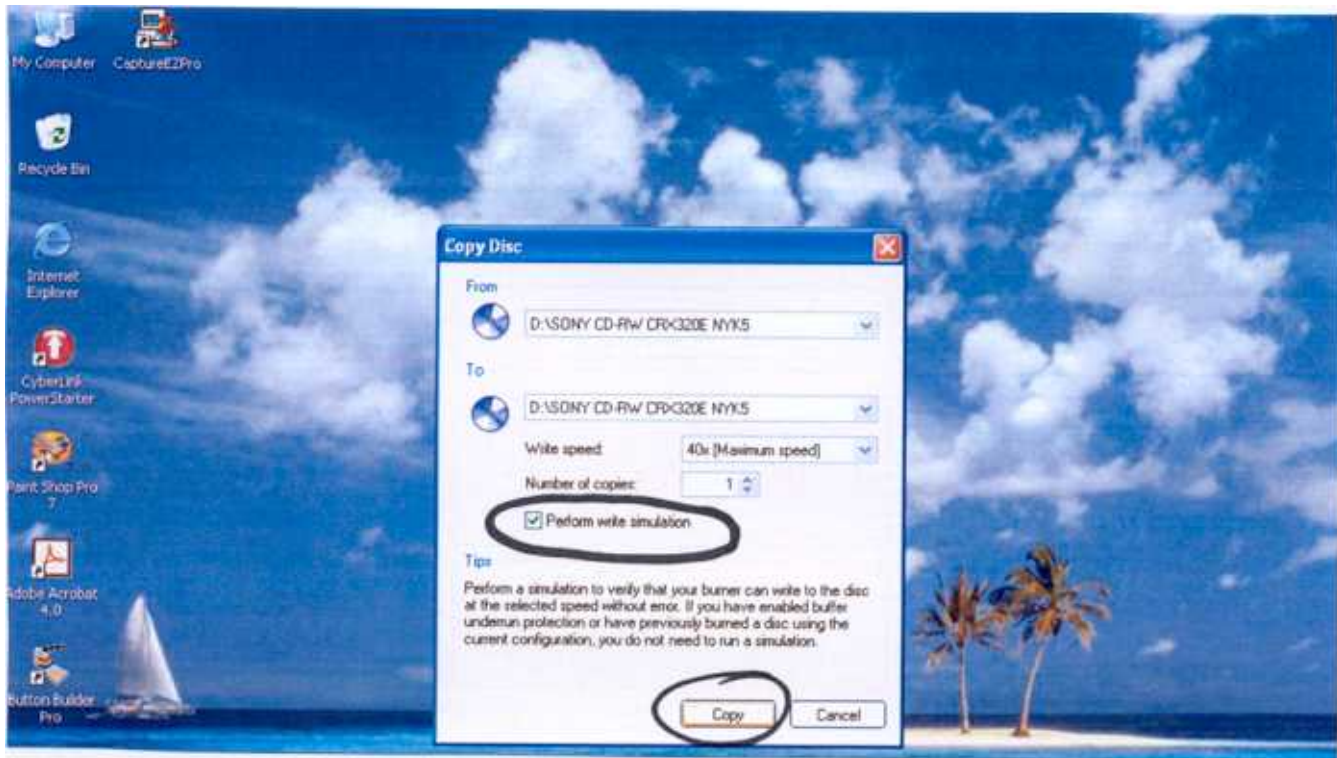

1   Double click on the CyberLink Power Starter icon.

You will see the following screen:
Click on the COPY & BACKUP icon.
Click on COPY A DATA CD

You will see the following screen:

The first time you copy a CD, be sure there is a checkmark beside "Perform write simulation." The write simulation checks to see if the blank CD you purchased is compatible with the CD burner inside your computer. If the simulation finds that the CD is compatible, you will see the screen on the next page.

NOTE: You will not have to run a simulation in the future UNLESS you use a different speed or brand of blank CD's.
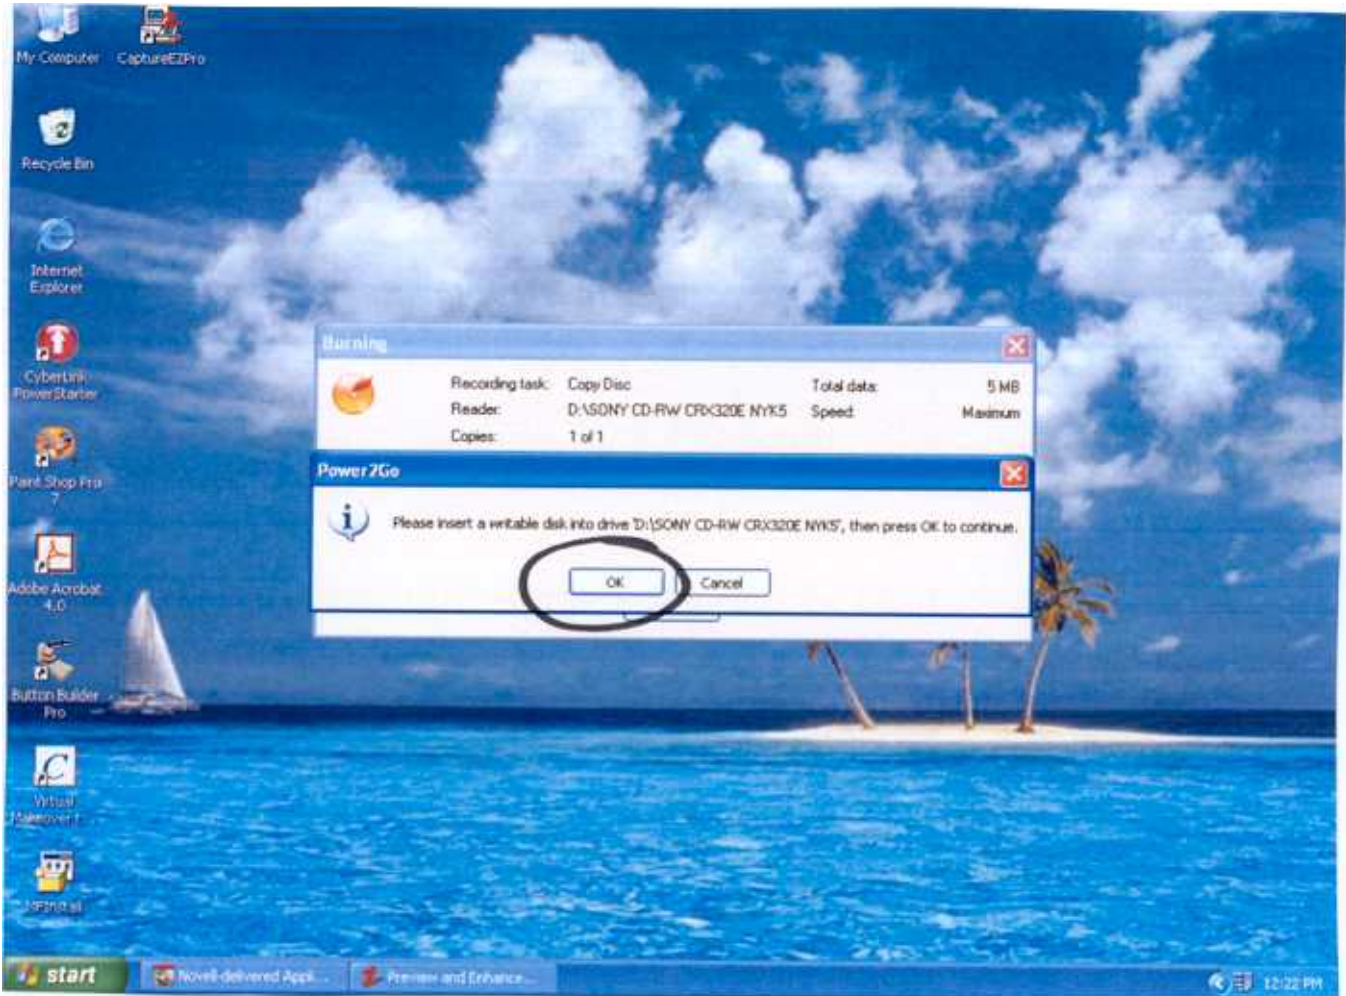

Click COPY.

The simulation will begin reading the blank CD. When the progress reaches 100%, you will see the screen on the next page.
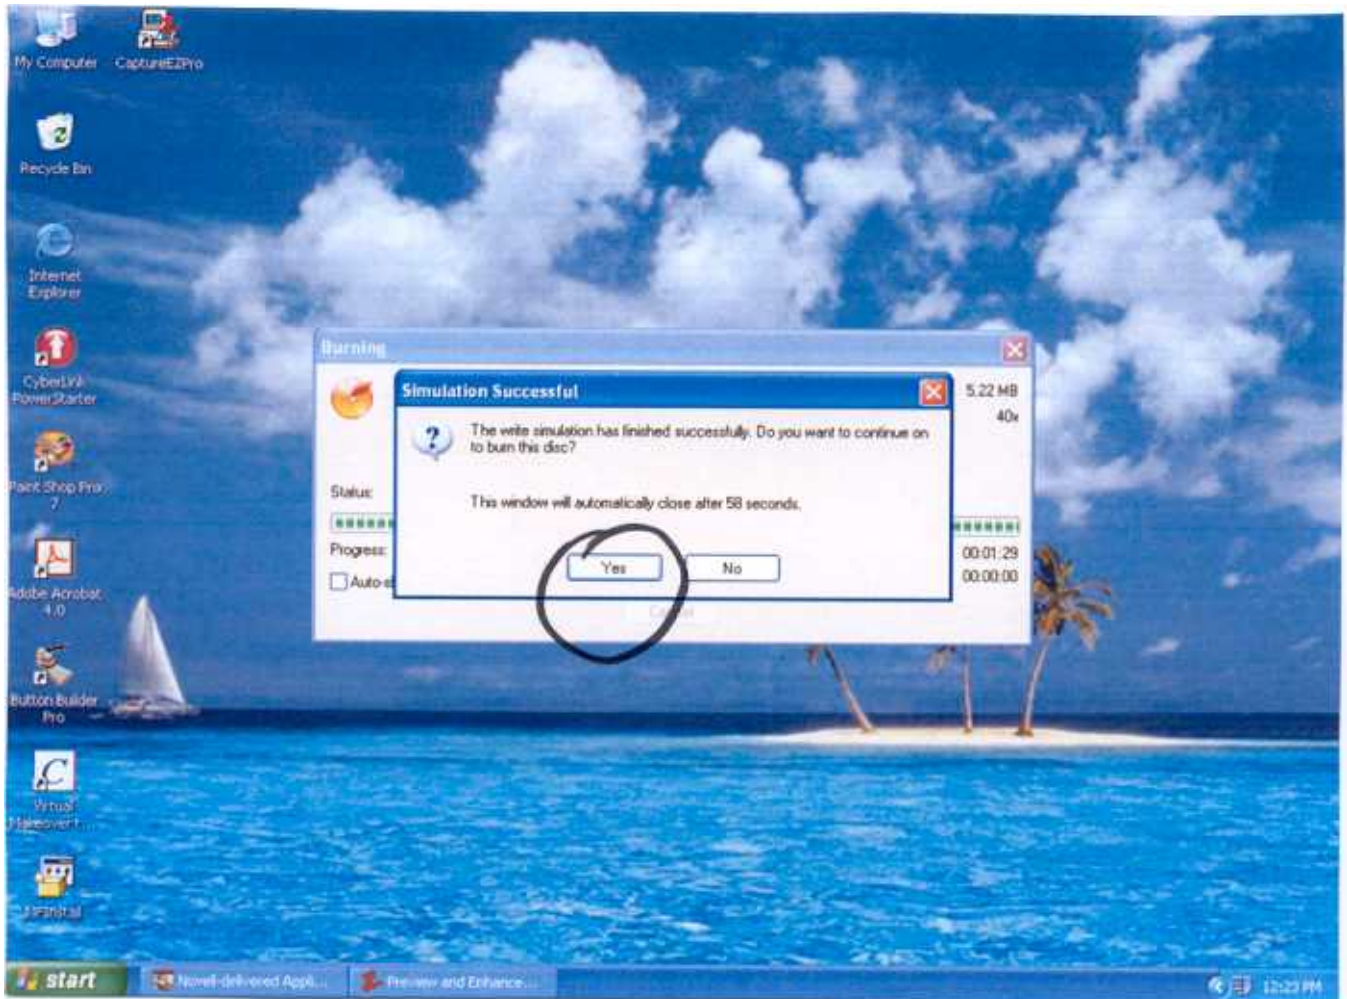

You will be asked to insert a blank CD. The simulator will begin writing to the blank CD.   Click OK.

_____

When the progress reaches 100%, you will see the screen on the next page.

When the simulation is successfully finished, click YES.

The CD will begin the actual burn process. When the progress reaches 100%, you will see the screen on the next page.

When the CD is burned successfully, you will see the following screen.
Click OK.
